

Traditional craftsmanship Contemporary vision Remarkable results

At EmanuelHendry we specialise in high-quality bespoke timber framed buildings and structural carpentry. Our beautifully handcrafted buildings and structures blend traditional craftsmanship with contemporary techniques and design.

We can build anything with wood, from modern timber buildings to the repair of historic oak frames. We design and prefabricate all of our timber structures at our workshop and studio in Drewsteignton, Devon, where our small team of highly skilled carpenters and designers are based.

We're passionate about timber architecture and work closely with clients, architects and engineers to deliver results that are aesthetically inspiring and thoughtfully detailed. With us you'll always get an environmentally conscious, high-performance and cost-effective building that is unique, imaginative and full of character.

## A bespoke service from concept to completion

Wherever you are in the UK, we offer a bespoke service from concept through to completion. You can come to us with an idea and we will see it through right from the initial concept to the complete finish or we can provide our services to fit in at any stage of your project.

## Our services include:

- Conceptual design and 3D visualisation
- Planning permission
- Detailed design and drafting
- Engineer's approval
- Workshop fabrication
- Delivery
- Frame raising
- First and second fix carpentry
- Joinery and glazing

## Our projects include:

- Houses and offices
- Historic building conservation and repair
- Garden rooms, conservatories and studios
- Barns, garages and outbuildings
- Balconies and stairways
- Shelters and landscape furniture
- Unique timber installations
- Supply-only trusses

If you wish to discuss a potential project with us, or would like to know more about what we do, please get in touch. We'd be delighted to hear from you.
